Description

This is a unique version of the Amsler Grid Test, the macular degeneration screening tool, with distinct advantages over the standard 'paper chart' format of the test. With the Amsler Grid Test secured inside a keychain viewer, it forces the user to view with one eye at a time, into a fixed area where they can focus only on the Amsler Grid. It is also very portable, and doubles as a promotional tool for an eye care practice.

Pricing includes a custom imprint on one side of the viewer, with your eye clinic name and phone number, reminding patients and their friends of your practice! If you would like to use your own logo, please choose that option below and instructions will be sent on how to send that to us.

*Pricing shown on website is per 'Case of 100 pcs - bulk pack'.
