10 or more \$35.00
50 or more \$32.00

Short Description

PRIMARILY FOR USE WITH SLIDE FILM. Holds a slide film chip roughly half the size of a 35mm slide frame - 0.725" x 0.87"

**Although the 'Solid' colored opaque film viewers are primarily for use with color slide film that will be 'back lighted' when viewed inside the viewer, some of the lighter colors (white, fuchsia, lime, etc.) will allow enough light in from the side of the housing to work OK with some photo prints, especially B&W or sepia prints. It is best to experiment with this before ordering a large quantity of product.

Description

- Holds a slide film chip the size of a 35mm slide **or** a digital print 0.725" x 0.87"
- Sold **plain** unassembled without images
